

Harvester Blade Replacement Part

This is a replacement blade for harvesters. The blade features toothed cutting edges and mounting holes.

Product Overview

High-Performance Harvester Blade

This harvester blade replacement part is engineered for durability and precise cutting performance in agricultural machinery. Featuring a robust design with toothed cutting edges, it ensures efficient crop harvesting and smooth operation. The part includes multiple precision-drilled mounting holes, allowing for easy installation and secure attachment during maintenance routines.

Technical Specifications

Color

Green

Design Features

Toothed Cutting Edge, Multiple Mounting Holes, Agricultural Grade, Replacement Part

Application

Agricultural Machinery Repair and Maintenance
