

Harvester Gear Bevel Set 12T 28T

This gear bevel set contains a 12T and 28T gear. It is suitable for use in Kubota harvesters, tractors, and rotary tillers.

Product Overview

High-Precision Bevel Gear Set

This 12T and 28T gear bevel set is engineered specifically for high-demand agricultural machinery including harvesters, tractors, and rotary tillers. Constructed from high-strength alloy steel and heat-treated for superior wear resistance, these components ensure smooth power transmission and reliable operation in the field. They serve as direct replacements for original equipment, helping to minimize downtime and maximize productivity during critical harvesting seasons.

Technical Specifications

A wide range of precision-engineered transmission components and drivetrain elements for harvesters and tractors.

Gear Configuration

12 T

Pinion Teeth

28 T

Bevel Gear Teeth

Material & Treatment

High-Strength Alloy Steel, Heat-Treated, Wear Resistant, Precision Machined

Compatibility

Compatible Machinery

- Grain Harvesters
- Agricultural Tractors
- Rotary Tillers
- Paddy Field Stubble-Bury Beaters
- Paddy Field Ridge Shapers

Harvester Series Compatibility

DC60 • DC68G • 688Q • DC70G • DC70H • DC70PLUS • DC95 • DC105 • AW70 • AW82 • AW85 • YH700 • YH850 • YH880

Tractor Series Compatibility

L1500 • L2201 • L2202 • L2402 • L3408 • L3608 • L4508 • L4708 • L5018 • M6040 • M5000 • M7040 • M8540 • M9540 • M9000 • M105 • M1304

Tiller Series Compatibility

RX162 • RX164 • RX180 • RX182 • RX220

Logistics & Support

Service Capabilities

- Tailor-made manufacturing
- Rigid quality control
- International technical support
- Extensive spare parts stock

Logistics Warehouse Area

3000 sqm
