Overview

Engineered for optimal performance and durability in demanding agricultural environments.

High-Performance Harvester Track

This harvester rubber track is engineered for demanding agricultural applications, providing superior traction and durability in diverse field conditions. Featuring a robust construction with a width of 450mm, a 90mm pitch, and 48 links, it is designed to minimize ground pressure and vibration while maximizing operational efficiency. The track is built to withstand heavy loads, offering a reliable solution for professional harvesting machinery.

Technical Specifications

Precision-manufactured tracks designed for reliable traction in agricultural machinery.

Dimensions

450 mm

Width

90 mm

Pitch

48 links

Link Count

Customization Options

Link and pitch can be adjusted upon request

Performance Features

Key Characteristics

- Less damage to ground surface
- Low noise operation
- High running speed
- Reduced vibration
- Low ground contact pressure
- High tractive force
- Lightweight construction
- Easy to replace

Warranty

1 Year Warranty

Application

Constructed for durability and optimal performance, palletized for efficient storage and transport.

Primary Application

Harvester, Rotovator, Agricultural Machinery
