

# Harvester V-Belt

This V-belt is designed for use in rice-wheat harvesters. It features a wrapped cloth construction for enhanced durability and grip.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Harvester V-Belt

This V-belt is specifically engineered for use in large rice and wheat harvesting machinery, providing reliable power transmission in demanding agricultural environments. Featuring a robust wrapped cloth construction, it offers enhanced wear resistance, superior grip, and a prolonged service life. Designed to withstand the rigors of field operations, this belt ensures consistent performance for critical harvesting equipment.

## Technical Specifications

Belt Size Designation	B-40
Dimensions	11X10-1120
Construction	Wrapped cloth construction
Application Suitability	Rice Harvesters, Wheat Harvesters, Agricultural Machinery, Power Transmission

## Performance Features

### Key Benefits

- Enhanced wear resistance
- Improved grip for efficient power transfer
- Prolonged service life
- Designed for heavy-duty agricultural use
