

HD15 Male to Male Cable

This is a high-quality HD15 (VGA) male to male cable for connecting computers to monitors or projectors. It features robust connectors and shielding to ensure a stable and clear signal transmission.

Overview

HD15 Male to Male Cable

This HD15 male-to-male cable is designed for reliable signal transmission between computers and display devices like monitors or projectors. It features robust construction with high-quality shielding to maintain signal integrity and minimize interference. Suitable for various display applications, this cable ensures a stable connection for resolutions up to 1080p.

Technical Specifications

Outer Diameter (Option 1)	7.3 mm
Wire Gauge (Option 1)	28AWG
Outer Diameter (Option 2)	8 mm
Wire Gauge (Option 2)	26AWG
Conductor Material	Copper (Cu)
Construction Type	Solid
