

HDMI 1x2 Splitter

The HDMI 1x2 Splitter allows a single HDMI source to connect to multiple HDMI displays. It easily splits one HDMI device's signal to two HDMI-compatible monitors or projectors.

Overview

Professional HDMI Distribution

The HDMI 1x2 Splitter efficiently distributes a single HDMI source signal to two HDMI-compatible displays simultaneously. Designed for versatility, it can also function as a signal regenerator when placed at the end of a long HDMI cable run. This compact, reliable solution is ideal for home theater setups, digital signage, and professional presentations requiring high-definition output.
