Overview

High-Performance Signal Transmission

This HDMI extender is a powerful solution designed for video wall applications and professional AV setups. It utilizes cutting-edge technology to transmit high-definition video and audio signals over long distances using either CAT.5e/6 cabling or fiber optic connections. The system ensures reliable signal integrity, making it an ideal choice for demanding environments requiring extended reach and high-quality performance.

Technical Specifications

Transmission Medium	CAT.5e, CAT.6, Fiber Optic
Maximum Resolution	1080p

Key Features

Key Features

- EDID management
- HDCP compliance
- Bidirectional IR control

Primary Applications

Video Walls • Long-distance AV • Industrial AV
