

HDMI Male-to-Male Cable

This is a high-quality HDMI cable with 19-pin male-to-male connectors. It features gold-plated contacts, nickel-plated shielding, ferrite cores, and a durable nylon sleeve.

Overview

High-Performance HDMI Connectivity

This HDMI male-to-male cable is engineered for reliable signal transmission, making it an ideal choice for connecting televisions and other high-definition devices. Featuring a robust 19-pin configuration, the cable includes advanced shielding and gold-plated contacts to ensure optimal signal integrity. Built with a durable nylon sleeve and integrated ferrite cores, it offers both longevity and protection against interference for a high-quality viewing experience.
