

# HDMI Splitter 1 In to 4 Out

This HDMI splitter distributes a single HDMI source to multiple displays simultaneously. It supports high-definition video and audio signals, ensuring optimal signal transmission and minimal loss.

## Product Overview

### High-Definition Distribution

This HDMI splitter efficiently distributes a single HDMI source signal to four separate displays simultaneously. Designed for optimal signal transmission with minimal loss, it supports high-definition video and audio output. It is an ideal solution for environments requiring synchronized multi-screen setups, such as professional presentations, digital signage, and home entertainment systems.

## Technical Specifications

Input Configuration	1 x HDMI Input
Output Configuration	4 ports
Key Features	HD Video Support, HD Audio Support, Simultaneous Output, Low Signal Loss

## Applications

### Recommended Applications

- Professional Presentations
- Digital Signage
- Home Entertainment Systems
- Multi-display Environments
