

# HDMI Splitter 1x4

This HDMI splitter distributes a single HDMI input signal to four identical HDMI output signals. It allows for simultaneous display of the same content on multiple screens or devices.

## Overview

### Professional HDMI Distribution

The HDMI Splitter 1x4 is designed to efficiently distribute a single HDMI input signal to four identical HDMI output signals, enabling simultaneous display across multiple screens. This device supports high-definition video resolutions including 1080p and 4K, ensuring clear visual output for various professional environments. It is HDCP compliant for protected content and includes an external power adapter for reliable, consistent operation.
