

HDPE Pipe Fittings for Water Supply

These HDPE pipe fittings are designed for water supply systems. They are manufactured using injection molding, ensuring precise dimensions and reliable performance.

Product Overview

High-Performance HDPE Pipe Fittings

These HDPE pipe fittings are engineered for reliable water supply systems, offering durability and precise dimensions. Manufactured using advanced injection molding techniques, they ensure consistent performance and seamless integration. This comprehensive range includes reducing adapters, 45-degree and 90-degree elbows, caps, and equal tees, providing versatile solutions for complex piping infrastructure.

Technical Specifications

Size Range	75mm to 630mm
Manufacturing Method	Injection Molding, Hot-Melt Connection

Available Configurations

Types Available

- Reducing Adapters
- 45° Elbows
- 90° Elbows
- Caps
- Equal Tees

Standard Dimensions

Type	Size Range (mm)
Reducing Adapters	75x63 to 630x500
45° Elbows	75 to 200
90° Elbows	75 to 200
Caps	75 to 400
Equal Tees	75 to 200
