Product Overview

Versatile Liquid Storage Solution

These durable plastic drums are constructed from high-density polyethylene (HDPE), ensuring excellent chemical resistance and impact strength for demanding environments. Designed for reliability, each unit features a secure screw-top lid with an integrated spout for controlled, leak-proof pouring. With an ergonomic handle for comfortable transport, these containers are ideal for safely storing and dispensing water, fuel, chemicals, and other industrial fluids.

Technical Details

Available Capacities

- 5L
- 10L
- 20L

Material

High-Density Polyethylene (HDPE)

Key Features

Chemical Resistant, Impact Resistant, Leak-proof, Screw-top Lid, Ergonomic Handle

Applications

Suitable Applications

Fuel Storage • Water Transport • Chemical Handling • Automotive • Gardening
