

Hearing Protection Earmuffs

Earmuffs provide hearing protection in noisy environments. They feature soft ear cushions, an adjustable headband, and durable construction.

Product Overview

Professional Hearing Protection

These hearing protection earmuffs are engineered for reliable noise reduction in demanding industrial and construction environments. Designed with user comfort in mind, they feature an adjustable headband and soft ear cushions suitable for extended wear throughout the workday. The durable construction ensures long-lasting performance, making them an essential safety component for professionals exposed to high-noise settings.

Design & Comfort

Headband	Adjustable
