

Heat Pump Compressor

This high-efficiency compressor is designed specifically for heat pump applications. It is optimized for superior performance and reliability in light commercial refrigeration systems.

Overview

High-Efficiency Heat Pump Compressor

This high-efficiency compressor is purpose-built for heat pump applications, delivering reliable performance and longevity. It is specifically optimized for light commercial refrigeration systems, ensuring consistent cooling and heating capacity across diverse operating conditions. Engineered with advanced internal components, this unit provides quiet operation and minimal vibration for demanding professional environments.

Technical Specifications

Model Series

HIGHLY 3.0 II • 4X

Application

Light Commercial Refrigeration

Key Performance Features

Quiet Operation, Minimal Vibration, High Efficiency

Refrigerant Compatibility

Multi-Refrigerant Compatible
