

Heat Resistant Slotted Turner with Stainless Steel Shaft

This kitchen utensil features a black slotted turner made of heat-resistant material, ideal for flipping and serving food. It has a stainless steel shaft connecting the turner to a black ergonomic handle with a hanging loop for convenient storage.

Product Overview

Professional Grade Slotted Turner

This durable slotted turner is expertly designed for high-volume kitchen environments, featuring a heat-resistant head perfect for flipping and serving. The integrated stainless steel shaft provides exceptional structural integrity and balance, ensuring longevity during intensive use. Completed with an ergonomic handle and convenient hanging loop, it is a versatile tool for any professional culinary space.
