

Heated Neck Massage Pillow

This neck massage pillow provides heat therapy and three-dimensional gravity traction. It features three-stage temperature control and a removable, washable cover.

Product Overview

The MQ01 multifunctional hot compress pillow featuring graphene fiber heating and gravity traction.

Multifunctional Hot Compress Pillow

The MQ01 is a compact, multifunctional neck massage pillow designed for therapeutic relief and comfort. It utilizes superconducting graphene fiber to provide rapid, even heating with three-stage temperature control for personalized physiotherapy. Engineered for portability, it features USB power compatibility and an ergonomic, three-dimensional gravity traction design to support the neck effectively.
