

Heated Table Appliance with Wooden-Style Top

This warmer appliance features a rectangular design with a wooden-style tabletop and supportive legs. It is electrically powered and intended for space heating, providing localized warmth like a heated table.

Product Overview

Comfort and Design Combined

This heated table appliance combines practical space-heating functionality with an aesthetic wooden-style finish. Designed to provide localized warmth, it serves as an elegant solution for professional or commercial environments. The integrated design ensures a seamless look while maintaining the comfort of those nearby.
