

Heated Windshield Wiper Blade

This heated windshield wiper blade enhances visibility in winter by melting ice and snow. It features durable construction and a universal adapter for easy installation.

Product Overview

Clear Visibility in Harsh Winter Conditions

This advanced heated windshield wiper blade is specifically engineered to provide superior visibility during severe winter weather. By utilizing an integrated heating element, it effectively melts ice and snow upon contact, ensuring a consistently clear windshield for safer driving. Its durable construction is built for long-lasting reliability, and the included universal adapter ensures broad compatibility for simple installation across most vehicle models.

Technical Specifications

Installation	Universal adapter included for wide vehicle compatibility
Power Connection	Wired connection to vehicle electrical system
Key Features	Heated element, Ice melting, Snow clearing, Universal mount
