

# Heavy-Duty Adjustable J-Hook Clamp

This heavy-duty clamp features a J-hook design for secure attachment. It is constructed from durable metal and includes two adjustable bolts.

## Product Overview

### Heavy-Duty Adjustable J-Hook Clamp

This heavy-duty clamp features a robust J-hook design engineered for high-stress industrial environments. Equipped with two adjustable bolts, it provides precise tensioning and secure attachment for critical machinery components. Constructed from durable metal, it is specifically optimized for plastic and rubber machinery applications where maintaining alignment and strong clamping force is essential.

## Performance Metrics

### Work Load Capacity

**2200 LBS**

Max Work Load

## Technical Specifications

Material	Durable Metal
Adjustment Type	Dual Adjustable Bolts
Industry Applications	Plastic Machinery, Rubber Machinery, Industrial Clamping
