Overview

Heavy Duty Adjustable Pallet Racking

This CE-approved heavy-duty pallet racking system is engineered for efficient storage and organization in demanding warehouse and industrial environments. Constructed from high-quality cold-rolled steel, the system offers exceptional durability and load-bearing capacity. With adjustable beam levels and a wide range of configuration options, it is designed to optimize space utilization and streamline inventory management for diverse storage needs.

Technical Specifications

Load Capacity

6000 kgs

Max Load per Beam Level

Material & Finish

Cold-roll Steel Q235, Powder Coated, Galvanised

Dimensions

Dimension Ranges

Dimension	Range (mm)
Height	500 - 20,000
Depth	400 - 1,500
Length	1,000 - 4,000

Components & Accessories

Available Accessories

- Horizontal & diagonal braces
- Row spacer
- Upright footplates
- Safety locking pins
- U-shape & L-shape Post Protectors
- Frame Barrier
- Pallet Supporting Bar
- Mesh Deck
- Steel/Plastic/Special Pallets
- Cage & Mesh Container

Compliance

Certifications

CE Approved
