

Heavy Duty Air Transporter System for Load Movement

This heavy-duty air transporter system is designed for moving heavy loads with ease and precision. The system includes multiple air transporters, a control unit, and connecting hoses.

Product Overview

Heavy Duty Air Transporter System

This advanced air bearing system, often referred to as an air skate or air rigging system, is engineered to simplify the movement of heavy industrial loads. By utilizing air caster technology, the system provides a frictionless solution for transporting heavy machinery and equipment with precision and ease. It is a reliable, cost-effective, and safe method for industrial load management.

System Components

Included Components

- 6 x Modular air casters
- 1 x Control console
- 1 x Main air hose
- 4 x Vice air hoses (6 meters each)

System Configuration

Air Skate, Air Bearing Kit, Air Rigging System, Air Bearing Mover

Service & Warranty

Warranty

1 Year Warranty

Operational Principles

- Quality
- Safety
- Reliability
- Cost-effectiveness
