

Heavy-Duty Axle Beam for Industrial Machinery

This axle beam is designed for demanding industrial applications. It is constructed from high-strength steel for exceptional durability and load-bearing capacity.

Overview

German Series Axle Beam

This heavy-duty axle beam is designed for robust performance in demanding industrial applications. Constructed from high-strength steel, it offers exceptional durability and load-bearing capacity for various machinery. The unit features precision-engineered components to ensure accurate alignment and reliable operation in the field.

Technical Specifications

Beam Size Options

- Square 127mm
- Square 150mm

Load Capacity

10T, 12T, 14T, 16T, 18T

Standard Track Length

1850 mm

Customization

Yes
