

Heavy Duty Battery Clamp

These heavy-duty clamps are designed for secure electrical connections in various applications. They feature strong spring tension for a firm grip and durable construction for long-lasting performance.

Product Overview

Professional Grade Connectivity

This heavy-duty battery clamp is engineered for secure and reliable electrical connections across a wide range of automotive, marine, and industrial environments. Featuring robust construction with high-conductivity materials, it ensures consistent performance for battery charging, grounding, and testing applications. The design incorporates a strong spring mechanism for firm grip and insulated handles to prioritize user safety and comfort during operation.

Technical Details

Key Features

- Strong spring tension for firm grip
- High conductivity design
- Insulated handles for safety
- Suitable for various wire gauges

Material Composition

Copper-plated steel, Insulated rubber grips, Durable metal

Applications

Recommended Use Cases

Automotive • Marine • Industrial • Electrical Testing • Battery Charging • Grounding
