

Heavy-Duty Bench Vise with Serrated Jaws

This heavy-duty vise is designed for securely clamping workpieces. Its robust construction features serrated jaws for enhanced grip and a screw mechanism with a handle for applying clamping pressure.

Product Overview

Industrial Strength Clamping

This heavy-duty bench vise is engineered for high-performance clamping in demanding metalworking and woodworking environments. Its robust cast iron frame is finished with a corrosion-resistant red coating, ensuring long-lasting durability even under intensive use. Featuring precision-engineered serrated jaws, it provides superior gripping power for secure, stable workholding during assembly or repair tasks.

Technical Specifications

Material	Cast Iron
Surface Coating	Red corrosion-resistant coating
Jaw Design	Serrated for enhanced grip
Mounting	Workbench mountable base

Application Suitability

Suitable Applications	Metalworking, Woodworking, Assembly Tasks, Heavy-Duty Repair
