

# Heavy-Duty Bolt Cutter with Compound Lever

This bolt cutter is designed with hardened steel jaws to efficiently cut bolts, rods, and rivets. Its compound lever mechanism enhances cutting power, while the ergonomic handles ensure comfortable use.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Cutting Performance

This heavy-duty bolt cutter is engineered for demanding industrial and construction environments. Featuring a high-efficiency compound lever mechanism, it delivers significantly increased cutting power with minimal user effort. The hardened steel jaws ensure precise, clean cuts through bolts, rods, and rivets, while the ergonomic handle design reduces fatigue during extended use.

## Technical Specifications

Cutting Applications	Bolts, Rods, Rivets
Jaw Material	Hardened Steel

## Design Features

### Handle Features

Ergonomic • Comfort Grip

Mechanism	Compound Lever
-----------	----------------

## Usage

### Ideal Applications

- Industrial Maintenance
- Construction Sites
- General DIY
