

Heavy-Duty Bolt Cutter with Hardened Steel Jaws

This heavy-duty bolt cutter is designed for cutting bolts, rods, and other metal materials. Hardened steel jaws ensure durability, while long handles offer increased leverage and ergonomic grips provide comfortable handling.

Product Overview

Professional Cutting Power

This heavy-duty bolt cutter is precision-engineered for cutting through high-strength bolts, rods, and various industrial metal materials. Built with hardened steel jaws, the tool ensures exceptional durability and a long service life even under intensive use. The extended handle design maximizes leverage, allowing professionals to achieve clean cuts with minimal physical exertion while maintaining secure, ergonomic control.

Technical Specifications

Handle Features

- Extended length for increased leverage
- Ergonomic non-slip grips
- High-force cutting mechanism

Jaw Material	Hardened Steel
--------------	----------------

Certifications & Usage

Suitable Applications	Bolts, Metal Rods, Industrial Maintenance, Construction
