

Heavy-Duty Bolt Cutters

These bolt cutters are designed for cutting bolts, chains, and threaded rods. They feature high-leverage handles and hardened alloy steel jaws for increased cutting power and durability.

Overview

Professional Heavy-Duty Bolt Cutters

These heavy-duty bolt cutters are engineered for demanding industrial, construction, and maintenance environments. Designed to cut bolts, chains, and threaded rods with ease, they feature high-leverage handles that maximize cutting force while minimizing user effort. The hardened alloy steel jaws ensure long-lasting durability and precise, clean cuts every time.

Technical Specifications

Cutting Capabilities

- Bolts
- Chains
- Threaded rods
- General metal materials

Key Features

High-leverage handles, Hardened alloy steel jaws, Adjustable blades, Heavy-duty construction

Performance

Performance Metrics

1 High

Force Multiplication

1 Yes

Blade Adjustability

Applications

Primary Applications

Construction • Industrial • Maintenance
