Product Overview

Reliable Emergency Power

These heavy-duty booster cables are engineered for jump-starting vehicles with discharged batteries, ensuring you can get back on the road quickly. Designed for durability and safety, they feature insulated, color-coded clamps to prevent incorrect connections and ensure secure contact. The tangle-free cable construction allows for convenient storage and ease of use, making them an essential tool for cars, trucks, and SUVs.

Technical Details

Vehicle Compatibility

- Cars
- Trucks
- SUVs
- 12V Battery Systems

Clamp Color Coding

Connection	Color
Positive	Red
Negative	Black

Safety Features

Insulated Clamps, Color-Coded Polarity, Tangle-Free Design, Weather-Resistant
