

Heavy-Duty Bow Shackle for Rigging

This heavy-duty bow shackle is designed for rigging and lifting applications. It is made from high-strength steel for durability and resistance to deformation under load.

Product Overview

Heavy-Duty Bow Shackle

This heavy-duty bow shackle is engineered for demanding rigging and lifting applications across marine and industrial sectors. Constructed from high-strength steel, it offers exceptional durability and superior resistance to deformation under load. The wide bow design accommodates multiple connections while effectively reducing stress concentration, ensuring reliable performance in harsh conditions.

Technical Specifications

Material	High-strength steel
Fastening Type	Screw pin
Surface Finish	Protective corrosion-resistant coating

Usage & Applications

Suitable Environments

Marine • Industrial

Compatible Connections	Ropes, Chains, Rigging Fittings
