

Heavy-Duty Brake Drum

This heavy-duty brake drum is engineered for reliable performance in demanding automotive braking systems. Constructed from durable cast iron, it features a precision-machined internal surface for optimal friction and includes multiple bolt holes for secure mounting.

Product Overview

Heavy-Duty Performance

This heavy-duty brake drum is engineered for demanding commercial vehicle applications. Constructed from high-quality cast iron, it ensures exceptional durability and optimal heat dissipation during operation. The precision-machined braking surface provides consistent, reliable stopping power, meeting or exceeding OEM standards for safety and performance.

Technical Specifications

Design Features

- Ribbed exterior for enhanced cooling
- Precision-machined internal braking surface
- Multiple mounting bolt holes for secure attachment

Part Identification

0310017040

Material

High-quality cast iron

Application

Application Type

Commercial Vehicles, Heavy-Duty Braking Systems, Automotive
