

Heavy-Duty Cable Cutters

These heavy-duty cable cutters are designed for cutting copper and aluminum cables. They feature high-leverage handles for increased cutting power and hardened steel blades for durability.

Product Overview

Professional Grade Cable Cutting Solution

These heavy-duty cable cutters are engineered for precision and durability in demanding electrical, construction, and industrial environments. Featuring high-leverage handles and hardened steel blades, they deliver clean, precise cuts through copper and aluminum cables with minimal distortion. The ergonomic design ensures operator comfort during repetitive tasks, while the integrated locking mechanism provides safe storage when not in use.

Performance Features

Blade Material

Hardened Steel

Compatible Materials

Copper, Aluminum

Cutting Quality

Clean and precise cuts to minimize cable distortion

Design & Ergonomics

Handle Design

- High-leverage design for increased power
- Ergonomic grips for comfort
- Integrated locking mechanism for safety

Applications

Primary Applications

Electrical Work, Construction, Industrial Maintenance
