

Heavy-Duty Cable Cutters

These cable cutters are designed for efficient and precise cutting of various types of cables. They feature hardened steel blades for durability and ergonomic handles for a comfortable grip.

Overview

Professional Grade Cable Cutting Solution

These heavy-duty cable cutters are engineered for professional electricians and technicians requiring precision and efficiency. Featuring hardened steel blades and a high-leverage design, they provide superior cutting power for copper, aluminum, and multi-conductor cables. The ergonomic handles ensure a comfortable grip, significantly reducing user fatigue during repetitive tasks.

Performance

Key Performance Features

1 Power

High-Leverage Design

1 Blades

Hardened Steel

Technical Specifications

Compatible Materials	Copper, Aluminum, Multi-conductor Cables
Blade Material	Hardened Steel

Design & Ergonomics

Handle Features

- Ergonomic grip design
- Fatigue reduction technology
- High-leverage mechanical advantage

Durability Features

Long Life • Heavy-Duty • Precision Cut

Application

Target Professionals

- Professional Electricians
- Maintenance Technicians
- Industrial Contractors
