

Heavy-Duty Cast Iron Auto Part

This heavy-duty component is made from cast iron and features cylindrical ends. It is designed with four mounting points for secure attachment to a vehicle's frame or structural element.

Overview

Rugged Automotive Component

This heavy-duty cast iron auto part is engineered for durability and reliable performance in demanding automotive applications. Featuring a robust design with integrated mounting points and cylindrical connection ends, it is well-suited for integration into vehicle drivetrain or suspension systems. The component is finished with a protective black coating to resist wear and environmental stress.

Technical Specifications

Material	Cast Iron
Surface Finish	Black Protective Coating
Mounting Configuration	4 points
Design Features	Heavy-Duty, Cylindrical Ends, Bolt-on Mounting

Application

Primary Applications

- Vehicle Drivetrain Systems
- Suspension Systems
- Structural Automotive Assemblies
