

Heavy-Duty Cast Iron C-Clamp

This C-clamp is designed for woodworking, metalworking, and general clamping tasks. Constructed from durable cast iron, it features a threaded spindle with a swivel pad for even pressure distribution.

Product Overview

Professional Holding Power

This heavy-duty C-clamp is engineered for demanding woodworking, metalworking, and general assembly applications. Constructed from high-durability cast iron, it provides exceptional holding strength and stability. Featuring a precision-threaded spindle and a swivel pad, it ensures uniform pressure distribution to keep workpieces securely in place during welding, gluing, or fastening.

Technical Specifications

Clamping Capacity

4 in

Clamping Range

Design Features

- Threaded spindle for precise adjustment
- Swivel pad for even pressure
- Heavy-duty industrial construction
- Suitable for welding and assembly

Construction Material

Cast Iron

Usage

Ideal Applications

Woodworking, Metalworking, Welding, Gluing
