Overview

Heavy-Duty Lifting Performance

The HSZ-A 619 Series Chain Block is a robust and reliable lifting device engineered for demanding industrial and construction environments. Constructed with high-strength alloy steel, it ensures consistent performance and longevity under heavy loads. The unit incorporates an integrated safety mechanism designed to prevent overloading, providing essential protection for operators during precise lifting operations.

Technical Specifications

Series Model	HSZ-A 619
Construction Material	High-strength alloy steel
