

Heavy Duty Chain Hoist

This robust chain hoist is designed for lifting heavy loads with precision. It features durable construction and a high-strength chain for reliable performance in demanding environments.

Product Overview

Heavy Duty Chain Hoist

This robust chain hoist is engineered for precision lifting of heavy loads in demanding industrial and construction environments. It features durable, high-strength construction designed for reliable performance and longevity. Equipped with an integrated safety mechanism to prevent overloading, this hoist ensures both efficiency and operational safety for professional users.

Performance Metrics

Rated Capacity

5 TON

Max Load

Safety Mechanisms

Overload Protection, High-Strength Chain

Applications

Recommended Use

- Industrial lifting
- Construction site material handling
- Heavy load positioning
