

Heavy-Duty Chain Hoist

This chain hoist is designed for lifting applications in agricultural construction. It features a robust chain and hook system for secure and reliable load handling.

Product Overview

Heavy-Duty Lifting Performance

This heavy-duty chain hoist is engineered for demanding lifting applications in agricultural and construction environments. Constructed with high-quality steel and featuring heat-treated components, it ensures maximum durability and operational safety. The precision-engineered alloy steel gears and German-manufactured load chain provide reliable load handling for professional lifting machinery.

Construction & Materials

Key Structural Features

- Hollow structure for increased strength-to-weight ratio
- Casting strength safety latches
- Strictly heat-treated major components

Material Composition

High Quality Steel, 35CrMo Alloy Steel, 20CrMnTi Alloy Steel

Performance Specifications

Manufacturing Standard

German Machine Processed Chain

Gear Material

20CrMnTi Alloy Steel

Hook Material

35CrMo Alloy Steel
