Product Overview

Heavy Duty Chain Hoist

This heavy-duty chain hoist is engineered for demanding industrial lifting applications, featuring a robust design built for durability and safety. Utilizing advanced gear technology and high-strength alloy steel components, it ensures smooth operation and reliable performance under heavy loads. The hoist is designed to meet international standards, providing a secure and efficient solution for construction sites, workshops, and factories.

Technical Specifications

Standards Compliance

ISO 3077-1984 • CE Certified

Available Capacities

1 Ton, 2 Ton

Braking System

Automatic double-pawl braking system

Gear Construction

Symmetrical arrayed high-speed synchronous gears made from international standard gear steel

Materials & Components

Material Composition

- High-class alloy steel (main components)
- High-strength alloy steel (hook)
- High-strength hardened steel (load chain)

Safety Features

- Automatic double-pawl brake
- Safety latch on hook
- High-precision welding technology on chain

Performance Metrics
