

Heavy Duty Compound Action Tin Snips

These tin snips are designed for cutting sheet metal. They feature high-leverage handles, hardened steel blades, and ergonomic grips, making them suitable for HVAC, roofing, and metalworking.

Product Overview

Professional Heavy-Duty Tin Snips

These heavy-duty compound action tin snips are engineered for high-performance cutting in metalworking environments. The tool utilizes a specialized compound action mechanism to maximize leverage, allowing for efficient and clean cuts through sheet metal. Designed with professional durability in mind, they feature hardened steel blades and ergonomic handle grips to ensure comfort and control during extended use.

Applications

HVAC, Roofing, Metalworking

Technical Features

Features List

- Compound action mechanism for increased cutting power
- Hardened steel blades for long-lasting durability
- Ergonomic handle grips for user comfort
- Heavy-duty construction for professional use

Performance Highlights

1 Compound
