

Heavy-Duty Connecting Link

This heavy-duty connecting link ensures secure and reliable connections in rigging and lifting applications. It is constructed from high-strength alloy steel for durability and long-lasting performance.

Overview

Heavy-Duty Connecting Link

This heavy-duty connecting link is engineered for secure and reliable performance in demanding rigging and lifting applications. Constructed from high-strength alloy steel, it offers exceptional durability and longevity for industrial use. The design features a convenient threaded pin for efficient assembly and disassembly, making it a versatile component for joining chains, wire ropes, and other lifting accessories.

Technical Specifications

Compatible Accessories

- Chains
- Wire ropes
- Lifting accessories

Material	High-strength alloy steel
Key Features	Threaded Pin, Heavy-Duty, High-Strength

Application & Usage

Primary Applications

Rigging • Lifting • Industrial Construction
