

Heavy-Duty Construction Compactor

This heavy-duty construction compactor features a robust design and powerful engine for efficient earthmoving and compaction tasks. Equipped with a large-diameter steel drum, it ensures optimal surface leveling.

Overview

Heavy-Duty Compaction Solution

This heavy-duty construction compactor is engineered for demanding earthmoving and surface leveling tasks. Featuring a robust design and a powerful engine, it ensures high efficiency and reliability in challenging construction environments. The operator cabin is thoughtfully designed with enhanced visibility and ergonomic controls to support comfortable and precise operation throughout long work shifts.

Technical Specifications

Equipment Type

Construction Machinery • Compactor

Model Number

TG19/22-M

Key Features

Performance Highlights

19 ton

Compaction Width Class

22 ton

Max Operating Weight

Design Features

- Large-diameter steel drum for optimal surface leveling
- Robust chassis for durability in demanding environments
- Enhanced operator cabin visibility
- Ergonomic control system
