

Heavy-Duty Crane Elevator for Agricultural Machinery

This heavy-duty elevator is designed for agricultural construction machinery, especially cranes. It features a robust build for lifting and moving heavy loads in demanding environments.

Product Overview

Heavy-Duty Crane Elevator

This heavy-duty elevator is specifically engineered for agricultural construction machinery, including cranes. It is constructed with durable, high-strength materials designed to withstand the most demanding operational environments. Engineered for maximum reliability and safety, this unit ensures efficient lifting and movement of heavy loads in various industrial applications.

Technical Specifications

Rated Capacity

1000 kg
Capacity

Standard Lift	3 m
Test Load	1500 kg
Model	GCT
Net Weight	12 kg

Compliance & Features

Key Features	Heavy-Duty Build, Agricultural Application, Industrial Grade, High Durability
