

Heavy-Duty Demolition Hammer

This demolition hammer is designed for heavy-duty concrete breaking and demolition tasks. With a robust motor and high impact energy, it offers efficient performance and durability.

Product Overview

Heavy-Duty Demolition Hammer Z1G-FD-65

The Z1G-FD-65 is a high-performance demolition hammer engineered specifically for heavy-duty concrete breaking and rigorous demolition tasks. It features a robust motor combined with high impact energy to deliver consistent, efficient results on demanding job sites. Designed with user comfort in mind, the tool incorporates an ergonomic build and an advanced vibration dampening system to minimize fatigue during extended operation.

Technical Specifications

Model Number	Z1G-FD-65
Ideal Applications	Construction, Renovation, Demolition

Features

Key Features

- Robust motor for heavy-duty performance
- High impact energy for concrete breaking
- Ergonomic design for improved handling
- Integrated vibration dampening system
