

Heavy-Duty Diesel Engine for Industrial and Marine Use

This heavy-duty diesel engine is designed for industrial and marine applications. It features an advanced fuel injection system and efficient cooling for reliable performance.

Overview

High-Performance Diesel Engine

The SC9DF diesel engine is a heavy-duty, high-performance power unit meticulously engineered for both industrial and marine applications. Its robust construction, combined with an advanced fuel injection system and efficient cooling, ensures reliable operation under the most demanding conditions. Designed for versatility, this engine delivers high power output and low fuel consumption while maintaining compliance with modern emission standards.

Key Features

Performance Metrics

1 High

Fuel Efficiency

1 Standard

Emission Compliance

Suitable Applications

Power Generation, Construction Equipment, Marine Propulsion

Technical Specifications

Engine Type	Heavy-Duty Diesel
Cooling System	Advanced Efficient Cooling
Fuel Injection	Advanced Injection System
