

Heavy-Duty Drilling Rig

This drilling rig is designed for heavy-duty drilling operations. Its complex mechanical system includes engines, hydraulic transmissions, and a central console box.

Overview

High-Performance Drilling Solutions

Leveraging five decades of manufacturing expertise, these heavy-duty drilling rigs are designed for demanding petrochemical engineering operations. The range covers power capacities from 250 HP to 4000 HP, ensuring a suitable configuration for various exploration and extraction needs. Buyers can choose from truck-mounted, trailer-moved, or skid-type designs to match specific site mobility requirements.

Technical Specifications

Power Capacity Range

250 HP

Minimum Power

4000 HP

Maximum Power

Manufacturing Heritage

Based on 50 years of manufacturing experience

Configuration & Mobility

Available Mounting Types

Truck Mounted, Trailer Moved, Skid Type

System Components

Core Mechanical Components

- High-power Engines
- Hydraulic Transmissions
- Centralized Console Box
- Robust Mechanical Systems

Industry Application

Primary Application

Petrochemical Engineering
