Product Overview

Heavy-Duty Dump Tractor QJ130

The QJ130 Dump Tractor is a robust and versatile vehicle engineered for heavy-duty hauling and construction applications. Featuring a durable chassis and efficient hydraulic system, it ensures reliable performance in demanding environments like mining and agricultural projects. The unit is equipped with a high-capacity dump bed and reinforced walls, making it ideal for transporting aggregates, soil, and debris.

Performance & Build

Performance Metrics

130 QJ

Model Series

Key Features

Heavy-Duty Hauling, Reinforced Dump Bed, Rugged Suspension, All-Terrain Capability

Operational Details

Suitable Applications

- Construction Sites
- Mining Operations
- Agricultural Projects
- Heavy-duty Material Transport

Operator Experience

Ergonomic cabin design with enhanced visibility and user-friendly controls for simplified operation and maintenance.
