

Heavy-Duty Earthmoving Bulldozer

This heavy-duty bulldozer features a large front blade for pushing and leveling materials. It is equipped with a fully enclosed cabin and heavy-duty tracks for operator safety, comfort and stability.

Overview

Heavy-Duty Earthmoving Bulldozer

This heavy-duty bulldozer is designed for demanding environments including large-scale construction sites, mining operations, and public engineering projects. Equipped with a robust metal blade and heavy-duty tracks, it excels at pushing and leveling soil, sand, and rubble with precision. The machine features a fully enclosed cabin to ensure operator safety and comfort during long shifts in diverse terrains.

Technical Specifications

Equipment Type

Crawler • Heavy-Duty

Model Number

PD165X-1

Applications

Primary Use Cases

- Construction sites
- Mining and quarries
- Military bases
- Heavy industry factories
- Public engineering projects

Performance Features

Key Performance Metrics
