

Heavy-Duty Earthmoving Equipment

This heavy-duty construction machinery is designed for loading, excavating, and bulldozing tasks. It features a robust hydraulic system and durable tires for reliable performance.

Overview

Versatile Earthmoving Solution

This heavy-duty construction machinery is engineered for demanding tasks, including loading, excavating, and bulldozing. It features a robust hydraulic system and articulated steering, ensuring high maneuverability and efficient material handling in challenging environments. Designed for reliability, the equipment is equipped with a powerful engine and durable tires, making it an ideal choice for construction, mining, and large-scale earthmoving projects.

Technical Specifications

Suitable Applications

- Construction
- Mining
- General Earthmoving

Primary Functions

Loading, Excavating, Bulldozing

Steering System

Articulated steering

Performance Features

Performance Highlights

1 Robust

Hydraulic System

1 High

Bucket Capacity

Build Quality

Heavy-Duty • Durable Tires
