

Heavy-Duty Electric Mixer

This high-torque electric mixer is designed for heavy-duty mixing applications. It features a robust motor, variable speed control, and ergonomic handles for comfortable operation.

Product Overview

High-Performance Mixing Solution

This heavy-duty electric mixer is engineered for demanding mixing applications, making it an essential tool for handling viscous materials like concrete, mortar, and paint. Featuring a robust motor with variable speed control, it ensures consistent results and operational flexibility. The unit is designed with ergonomic handles for user comfort and includes a durable mixing paddle and sturdy frame to maintain stability during intensive use.

Technical Specifications

Voltage	120 V
Frequency	60 Hz
Rated Current	10 A
Maximum Mixing Capacity	5 gallons
