

Heavy-Duty Enclosed Cargo Truck

This heavy-duty truck is equipped with a cage-like structure for secure cargo transport. It is designed with multiple axles and robust tires, making it suitable for various terrains.

Product Overview

Robust Transport Solution

This heavy-duty enclosed cargo truck is engineered for versatile logistics, featuring a specialized cage structure that ensures both security and optimal ventilation. Equipped with multiple axles, the vehicle is optimized for high-capacity transport across diverse terrain types. Its robust construction makes it an ideal choice for hauling livestock or industrial cargo requiring durable, reliable enclosure.

Technical Specifications

Cargo Body Type

Enclosed Cage • Metal Bar Construction

Axle Configuration

Multi-axle

Performance Metrics

Operational Duty
